

Exam : IBM 000-640

Title : rational test management

Update : Demo

1. Which of the following are viewed using the Rational Test Log Window?

- A. Output files created during the script execution
- B. Test plan listing with details
- C. Test cases that are marked suspicious
- D. Event types with pass/fail results

Correct: D

2. Which of the following tasks can be completed using the Manage Test Script Queries Window in TestManager? (Select all that apply.)

- A. Delete script queries from the test datastore.
- B. Use a default query to retrieve all scripts from the test datastore.
- C. Create a new query to retrieve all scripts meeting standard criteria.
- D. Customize script queries with user-defined criteria.

Correct: A B C

3. Which of the following statements describe TestManager Suites? (Select all that apply.)

- A. Can include programming logic between scripts to control suite execution.
- B. TestManager Suites cannot contain other suites.
- C. Execution results appear in a single test log.
- D. Execution results in the test log cannot be promoted.
- E. Can run on any computer designated in the defined computer list.
- F. Can include automated and/or manual test scripts.

Correct: C E F

4. What are the standard test input types in TestManager? (Select all that apply.)

- A. Microsoft Project tasks
- B. Rational Rose model elements
- C. Rational RequisitePro requirements
- D. Microsoft Excel values
- E. Microsoft Word headings

Correct: B C D

5. Given: You want to distribute a TestManager Suite to run on the first available resource. What kind of selector would you need to include in the Suite?

- A. Sequential
- B. Parallel
- C. Synchronization
- D. Random with replacement

Correct: B

6. TestManager offers reporting capabilities for requirements such as planning coverage and progress reports.

- A. True
- B. False

Correct: A

7. Given: You have implemented Rational Robot, Rational TestManager, and Rational ClearQuest. Which of the following tasks can be automated? (Select all that apply.)

- A. Test results reporting

- B. Defect tracking during testing
- C. Test script version control
- D. Test script automation

Correct: A B D

8. The Test Log Window can display log files from previous script runs.

- A. True
- B. False

Correct: A

9. Which of the following can be directly observed using the Test Log Window? (Select all that apply.)

- A. The pass/fail status of individual verification points
- B. Causes of verification point failures
- C. The pass/fail status of the script
- D. Causes of script failures

Correct: A C

10. Which test asset management tasks does TestManager allow users to perform? (Select all that apply.)

- A. Plan scripts before recording them
- B. Manage data used in testing
- C. Safeguard Robot test logs
- D. Automatically create test requirements

Correct: A B C

11. Given: You have created a default test datastore, have made no customizations, and are using the datastore to facilitate your testing effort. The test datastore contains which of the following assets? (Select all that apply.)

- A. Test scripts
- B. Test application
- C. Test browser
- D. Test logs
- E. Test configuration

Correct: A D E

12. The Rational Administrator is used for which of the following tasks? (Select all that apply.)

- A. To manage web site testing using Robot
- B. To create and manage test datastores
- C. To view test results
- D. To create and manage users and user groups

Correct: B D

13. Which of the following test input adapters are built into TestManager? (Select all that apply.)

- A. Rational Rose model elements
- B. MS Word documents
- C. C++ files
- D. Rational RequisitePro requirements
- E. Rational ClearQuest change requests

Correct:A D

14.Which of these information items are used when logging in with Robot, assuming that no other Rational products are open? (Select all that apply.)

- A.User Name
- B.Password
- C.Data types
- D.Project location

Correct:A B D

15.Which of the following contains the record of events that occur while playing back a script?

- A.Test log
- B.Data log
- C.Synchronization point
- D.Test plan listing
- E.Verification point
- F.Error log

Correct:A

16.Which of the following can be used to coordinate the execution of a TestManager Suite? (Select all that apply.)

- A.Inputs
- B.Preconditions
- C.Selectors
- D.Computer lists
- E.Configurations
- F.Delays

Correct:B C F

17.A TestManager test case is associated with both a manual and an automated implementation. What happens when you run that test case?

- A.The manual implementation runs, and then the automated implementation runs.
- B.The manual test dialog appears with a warning, and then the automated implementation runs.
- C.The automated implementation runs immediately and begins the test.
- D.A dialog box appears asking which implementation you want to run.

Correct:C

KillTest.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [HuaWei](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.
