

**Exam** : **Oracle 1Z0-630**

**Title** : Siebel7.7 Analytics Server  
Architect Professional Core Exam

**Update** : Demo

1. When double-clicking ABC.rpd in the Analytics/Repository directory, the Analytics Server architect gets the message The repository 'ABC.rpd' can only be opened as Read-Only. Do you want to open it? What can you tell from that message? Choose two.

- A. Siebel Analytics Server is running
- B. Siebel Analytics Web service is running
- C. ABC. rpd is a default repository specified in the NQSConfig.ini
- D. ABC. rpd is a special repository that can only be opened in online mode

Answer: AC

2. What information does the Administration Tool log when checking out a project? Choose three.

- A. Machine name
- B. User privileges
- C. Repository file size
- D. Projects
- E. Time

Answer: ADE

3. Which of the following object-level security action settings are done in the Siebel Analytics repository using the Administration Tool? Choose two.

- A. Assign users to a Web catalog group
- B. Create a new repository group
- C. Create a new user in the repository
- D. Create a Web catalog group
- E. Define permissions for dashboard

Answer: BC

4. Siebel Answer's subject areas correspond to which Analytics Administration Tool layer?

- A. Presentation layer
- B. Business Model and Mapping layer

- C. Physical layer
- D. Metadata layer

Answer: A

5. How do you invoke Time Series Wizard in the Siebel Analytics Administration Tool?

- A. In the Business Model and Mapping layer, select a business model and right-click > Time Series Wizard
- B. In the Physical layer, select a schema folder and right-click > Time Series Wizard
- C. In the Presentation layer, select a catalog folder and right-click > Time Series Wizard
- D. From the File menu, select Time Series Wizard
- E. From the Manage menu, select Time Series Wizard

Answer: A

6. Which of the following is NOT true of the Siebel Analytics repository?

- A. Physical layers can have multiple data sources
- B. Objects within a presentation catalog can derive from multiple business models
- C. By default, a presentation column uses the same name as its logical column in the Business Model and Mapping layer
- D. Key columns do not get exposed to the UI so it is acceptable to delete them in the Presentation layer
- E. Business Model and Mapping layer can have multiple data sources

Answer: B

7. What do the logical joins do? Choose two.

- A. They help the Analytics Server choose best physical path between multiple physical tables in each logical table
- B. They calculate measurable quantities
- C. They are always the same as the physical joins
- D. They determine cardinality between logical tables

Answer: AD

8. Which of the following is NOT true of consistency check?

- A. It guarantees that the business model is correctly built
- B. You can check the whole repository's consistency or just a business model's consistency
- C. It finds logical columns that are not mapped to physical sources
- D. It checks for undefined logical join conditions

Answer: A

9. To set the number of elements at each level of a dimension, which number would you use?

- A. The number of columns in a logical table
- B. The number of levels in a dimension
- C. The number of dimensions in a business model
- D. The number of tables in a physical model
- E. The number of distinct rows in a physical column

Answer: E

10. Which of the following is NOT necessary when specifying the most economical source?

- A. Create a new physical table source manually
- B. Create a new logical table source manually
- C. Select the physical table
- D. Specify the content

Answer: A

11. ABC wants to track the difference between the amount billed and the amount collected from its customers for every quarter. Which of the following methods would NOT be used in this situation?

- A. Create a new logical column in the business model
- B. Create a new column in the Presentation layer
- C. Use existing physical columns as objects in a formula
- D. Create a new physical column using the Calculation Wizard

E. Use the Calculation Wizard to create a new column comparing two existing columns

Answer: D

12. ABC wants to measure its revenue based on the country, region, and city by setting up columns to measure CountryRevenue, RegionRevenue, and CityRevenue. Which measure type is ABC using?

A. Attribute hierarchy

B. Fact hierarchy

C. Rank measure

D. Level-based measure

E. Share measure

Answer: D

13. ABC is a multinational corporation. It wants to measure its revenue based on the country, region, and city by setting up columns to measure CountryRevenue, RegionRevenue, and CityRevenue. Where would ABC's server architect set the grand total level?

A. Country

B. Region

C. City

D. None of the above; It needs to create an All-Country Grandtotal level and set it there

Answer: D

14. Which of the following are true of the prebuilt Siebel Analytics Repository? Choose three.

A. Prebuilt database objects map to Siebel OLTP or Siebel RMW but not both

B. Prebuilt connection pools reduce the overhead of connecting to a database

C. Many prebuilt star schemas support the prebuilt Siebel Analytics applications

D. Repository variables are prebuilt and therefore cannot be changed

E. Measures can come from multiple stars and case statements determine correct data sources to access

Answer: BCE

15. Pat is a server architect who is new to an integrated Siebel Analytics. Which of the following tools would Pat use to find out which presentation columns are related to a particular logical column of the Siebel Analytics repository?

- A. Variable Manager
- B. Security Manager
- C. Query Repository
- D. Analytics Dashboard

Answer: C

16. Which of the following is true of the query logging level?

- A. You can set the logging level for individual users in Siebel Analytics Administration Tool > Manage > Security > Users
- B. You can set the logging level for the groups in Siebel Analytics Administration Tool > Manage > Security > Users
- C. The lower the number of a log level, the more thorough the log is
- D. You can set the logging level for the groups and individual users in Siebel Analytics Administration Tool > Manage > Security > Users

Answer: A

17. ABC Company wants to analyze their sales figure by time period, products, product hierarchies, and sales rep. In this case, what would be the dimension?

- A. Sales figure
- B. Time period and products
- C. Products, product hierarchies, and sales rep
- D. Time period, products, product hierarchies, and sales rep
- E. Sales figure, time period, products, and sales rep

Answer: D

18. ABC Company is using Microsoft SQL Server ABC database and no data warehouse. After

establishing connection to the ABC database using ODBC, how would you verify that the connection to be used with the Siebel Analytics was established? Choose two.

- A. By running a query against ABC tables using MS SQL Query Analyzer
- B. By testing the connection via the Siebel Analytics ODBC Client tool
- C. By double-clicking the Physical layer's connection pool in the Siebel Analytics Administration Tool
- D. By opening Siebel Answers and checking whether the database shows up in the Subject Area

Answer: AB

19. After modifying and saving the Analytics repository file offline, which steps are necessary to reload the modified metadata? Choose two.

- A. Restart the Siebel Analytics Server
- B. Restart the DAC Server
- C. Restart the Siebel Server
- D. Restart the Siebel Analytics Web service

Answer: AD

20. Click the Exhibit. Which of the following is NOT true of the Exhibit?

- A. This repository is open in an online mode
- B. Customers, Periods, and Products are the dimensions
- C. Dollars, Units Shipped, Units Ordered, Net Weight Shipped, and Cuts are all aggregated

D. The CutsP column has been checked in to the server

Answer: D

21. How would you make it possible to check out objects automatically in the Siebel Analytics Administration Tool?

A. By navigating to Tools > Options > General > Check out objects automatically

B. By navigating to File > Check Out All

C. By navigating to File > Multi-User Checkout

D. By navigating to Manage > Variables

Answer: A

22. Which of the following is NOT true of Connection Pool?

A. Only one connection pool is allowed for each Physical layer database

B. You can use XML data by specifying Call Interface as XML

C. Maximum connection setting is the maximum number of concurrent connections

D. You can set whether the users can share a login

Answer: A

23. Click the Exhibit. Which of the following is NOT true of the query shown in this log?

```
NQQuery.log - Notepad
File Edit Format Help
----- SQL Request:
SELECT Customers."Sales Rep" saw_0, SalesFacts.Dollars saw_1 FROM Suppliersales WHERE
(Periods."Year" = 1999 AND Customers."Sales District" = 'MidAtlantic') ORDER BY 2

+++Administrator:10000:10006:----2004/02/25 11:03:41

----- General Query Info:
Repository: Star, Subject Area: Suppliersales, Presentation: suppliersales

+++Administrator:10000:10006:----2004/02/25 11:03:41

----- Sending query to database named ABC (id: <<2469>>):
select T43."SalesRep" as c1,
       sum(T56."Act1Extnd") as c2
from   "D1_customer2" T43,
       "D1_calendar2" T9,
       "D1_orders2" T56
where  ( T43."District" = 'MidAtlantic' and T9."Year" = 1999 and T9."YYYYMMDD" =
T56."PeriodKey" and T43."NewKey" = T56."CustKey" )
group by T43."SalesRep"

+++Administrator:10000:10006:----2004/02/25 11:03:41

----- Query Status: Successful Completion
```

- A. Physical database accessed for this query was named ABC
- B. The query was ordered by Sales District
- C. The Dollars information is coming from the SalesFacts presentation table
- D. Star repository was accessed for this query
- E. D1\_customer2, D1\_calendar2, and D1\_orders2 are the physical tables accessed for this query

Answer: B

24. Which of the following is NOT one of the ways to define physical foreign keys and joins?

- A. Create them using Joins Manager > Action > New > Foreign Key
- B. In the Business Model and Mapping layer, right-click the model folder > Physical Diagram and navigate to any of the paths
- C. In the Physical layer, right-click the database > Physical Diagram and navigate to any of the paths that are not grayed out
- D. In the File menu, select Create > Joins

Answer: D

25. What can be used to model a schema in which the dimensions and the fact have a many-to-many relationship?

- A. Complex join
- B. Aggregate table
- C. Helper table
- D. Bridge table

Answer: D

26. You would like to examine which columns in the Presentation layer map to a specific table in the business model. Which of the following utilities would you use?

- A. Siebel Answers
- B. Query Repository from the Analytics Administration Tool
- C. Online Help of the Analytics Administration Tool
- D. Physical Table Diagram from the Analytics Administration Tool

Answer: B

27. How are the columns in the Period tables map to each other across the layers of a repository? Select the correct pair to complete the following sentence: The presentation columns map to \_\_\_\_ and the logical columns map to \_\_\_\_.

- A. the logical columns in the Presentation layer; the physical columns in the Physical layer
- B. the logical columns of the Business Model and Mapping layer; the physical columns in the Physical layer or other logical columns of the Business Model and Mapping layer
- C. the logical columns of the Physical layer; the physical columns of the Physical layer
- D. the logical columns of the Business Model and Mapping layer; the logical columns of the Presentation layer

Answer: B

28. Which of the following are NOT the steps to create dimensions? Choose two.

- A. Drag physical table columns to the appropriate dimension levels
- B. Set the levels of a dimension such as Grand Total level or child level
- C. Create logical table key or keys
- D. Specify the number of elements at each level
- E. Check Use for drilldown for every key set for every level

Answer: AE

29. Which of the following are true of the Siebel Analytics repository? Choose two.

- A. The Physical layer can have only one data source
- B. Objects within a Presentation catalog can derive from multiple business models
- C. By default, a presentation column uses the same name as its logical column in the Business Model and Mapping layer
- D. Delete key columns in the Presentation layer even if you need the third part tools to access the Presentation layer using the ODBC driver
- E. The Business Model and Mapping layer can have multiple data sources

Answer: CE

30. Which of the following can be done using the Expression Builder utility? Choose three.

- A. Synchronize aliases
- B. Copy a business model with a Presentation catalog
- C. Update the Physical layer
- D. Create aggregations
- E. Create physical complex joins
- F. Create a calculation measure using existing logical or physical columns as objects in a formula

Answer: DEF

KillTest.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [HuaWei](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.

You can reach us at any of the email addresses listed below.
