

Exam : HP HP0-660

Title : NonStop Kemal Basics (Level1)

Update : Demo

1.What information can be found in the NonStop S-series Fastpath Guide?

- A.CRU replacement procedures
- B.AWAN configuration information
- C.system configuration file contents
- D.system installation checklist

Correct:D

2.Which tool do you use to order a Software Update?

- A.NTL
- B.Express Notice
- C.Scout for NonStop Servers
- D.CSSI website

Correct:C

3.Where can you order an Independent Product?

- A.Scout for NonStop Servers
- B.NonStop Technical Library (NTL)
- C.Express Notice
- D.CSSI website

Correct:A

4.If you need a list of Software Product Revisions (SPRs) for the current release of the NonStop Kernel operating system. Where can you find this information?

- A.Scout for NonStop Servers
- B.Hotstuffs
- C.SPR Notes
- D.CSSI website

Correct:A

5.What type of information would you find on the NonStop Technical Library (NTL)?

- A.SSG Notes
- B.Softdocs
- C.Technical Update Training
- D.Product Optimization Guide

Correct:B

6.One of the features of FUP is to provide _____.

- A.information about types of OSS files and NonStop SQL files
- B.the ability to start and stop devices
- C.information about types of Enscribe files and NonStop SQL files
- D.configuration capability to add devices to the server

Correct:C

7.Which TACL command is used to temporarily prevent a process from competing for system resources?

- A.break
- B.suspend
- C.hold
- D.pause

Correct:B

8.Which message system structure is used to cache incoming data between processes in different processors?

- A.TLE
- B.PCB
- C.MQC
- D.ACB

Correct:C

9.An autosaved configuration file is created when _____.

- A.the system is loaded from the SYSnn.confbase file, or from a saved configuration file
- B.the system is loaded from the SYSnn.config file
- C.the system halts in error
- D.the TSM detects a ServerNet SAN deadlock

Correct:A

10.Which system feature is designed specifically for failure analysis?

- A.EMS
- B.TEDIT
- C.SAFECOM
- D.PERUSE

Correct:A

11.Which components does a NonStop S7000 PMF CRU contain? Select THREE.

- A.PMB
- B.MFIOB
- C.ServerNet interface board
- D.power supply
- E.SEBC
- F.E4SA

Correct:A B D

12.A shared buffer model can be useful when reading _____.

- A.a single record or switching between files on successive reads
- B.partial blocks of data from several files
- C.multiple records or switching between files on sequential reads
- D.whole blocks of data from several files

Correct:D

13.What is a feature of NonStop SQL/MP?

- A.It provides a command interpreter from both the Guardian and OSS environments.
- B.It allows for tables to be repartitioned while online.
- C.It supports access to nonstructured database files.
- D.It supports relational databases on multiple operating systems.

Correct:B

14.SQLCI can be used to _____.

- A.prepare SQL query statements for re-compilation
- B.enter brief queries and generate formatted reports

- C.convert SQL tables to Enscribe files
- D.collect and examine performance statistics on processes

Correct:B

15.What is the function of NonStop TS/MP?

- A.to provide an application for a client/server framework
- B.to provide database recovery
- C.to provide data compression and decompression
- D.to replace the LINKMON or PATHMON with an RSC or POET client

Correct:A

16.OSS APIs and utilities are based on which open standards?

- A.UNIX Open and Common Open
- B.DCE and CORBA
- C.POSIX and X/OPEN
- D.SCO and AIX

Correct:C

17.A persistent process is a process that _____.

- A.continues to run after a power failure and the system is on battery backup
- B.cannot be stopped by another process
- C.will be restarted in the event of a failure by a monitor process
- D.checkpoints state information to its backup process

Correct:C

18.The OSS file system resolves all OSS pathnames using an OSS server called the _____.

- A.OSS file manager
- B.OSS path server
- C.OSS monitor
- D.OSS name server

Correct:D

19.Which of the following are considered standard Enscribe file types?

- A.key-sequenced files, entry-sequenced files, and relative files
- B.object files, entry-sequenced files, and relative files
- C.key-sequenced files, entry-sequenced files, and edit files
- D.key-sequenced files, entry-sequenced files, and SQL tables

Correct:A

20.What is the recommended tool when replacing a PMF CRU?

- A.WAN Wizard Pro
- B.TFDS
- C.GRT
- D.TSM

Correct:C

21.What is a feature of the SEB?

- A.The SEB connects the router in the PMF CRU to one ServerNet fabric.
- B.There are five 50-pin ServerNet connectors on an SEB.
- C.Each SEB provides access to both the X fabric and the Y fabric.

D.ServerNet adapters cannot be installed in both processor enclosures and I/O enclosures.

Correct:A

22.Increasing the number of disk processes per logical volume _____.

- A.provides fault tolerance
- B.decreases memory usage while not affecting disk I/O performance
- C.increases memory usage and improves disk I/O performance
- D.decreases memory usage and improves disk I/O performance

Correct:C

23.Which command terminates a process from the TACL program?

- A.kill
- B.end
- C.exit
- D.stop

Correct:D

24.A Guardian disk file having security settings of "OGOO" (RWEF) allows a member of the file owner's administrative group to _____.

- A.read and write to the file
- B.write to the file
- C.purge the file
- D.rename the file

Correct:B

25.The Safeguard product maintains a database of information for the Safeguard subsystem. On what volume and subvolume is this database found?

- A.\$SYSTEM.SYSTEM
- B.\$SYSTEM.SAFEGARD
- C.\$SYSTEM.SAFE
- D.\$SYSTEM.GUARD

Correct:C

26.Which OSS command is used to determine the permissions (rwx rwx rwx) on an OSS file?

- A.ls
- B.ls -l
- C.listp
- D.fileinfo

Correct:B

27.The file \$SYSTEM.SYSTEM.USERID is a basic database of NonStop Kernel (NSK) users that contains _____.

- A.NSK group name, user name, and group number.user number
- B.NSK user ID aliases and file sharing group attributes
- C.NSK user ID OSS initial-directory and initial-program attributes
- D.NSK user ID password expiration and last logon time

Correct:A

28.Which capability is provided only by using the Safeguard subsystem?

- A.adding NonStop Kernel user IDs

- B.changing NonStop Kernel user ID passwords
- C.securing Guardian disk files
- D.setting an expiration date on a NonStop Kernel user ID password

Correct:D

29.Which utility is used to assign aliases to NonStop Kernel system user IDs?

- A.SAFECOM
- B.OSS shell
- C.SCF
- D.TACL

Correct:A

30.Using Safeguard, what could you do to determine if someone was attempting to break into a NonStop Kernel system?

- A.Create an access control list (ACL) for all disk files on the system.
- B.Enable the AUDIT-AUTHENTICATE-FAIL attribute.
- C.Create an ACL for terminals from which a user can log on to the NonStop Kernel system.
- D.Enable the AUTHENTICATE-FAIL-COUNT attribute.

Correct:B

KillTest.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [HuaWei](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.

You can reach us at any of the email addresses listed below.
