

Exam : **HP HP0-S17**

Title : Integrating and Managing HP
BladeSystem in the Enterprise

Update : Demo

1.You are designing a customer system that must comply with financial department regulations that require a tape backup of data be performed every 24 hours. The server blade specified in the design is a BL685c. You will use an Ultrium 448c Tape Storage Blade to satisfy the requirement of the tape backup solution. What are the requirements for this solution to be valid in a c7000 BladeSystem enclosure? (Select two.)

- A.HP Data Protector 6.0 must be installed on the partner server blade.
- B.The Microsoft iSCSI initiator must be installed on the partner server blade.
- C.The Ultrium 448c Tape Blade must be installed in the top bay adjacent to the server.
- D.The Ultrium 448c Tape Blade must be installed in the lower bay adjacent to the server.
- E.An HP PCI Express Mezzanine Pass-Thru Card must be installed in the mezzanine 3 slot.

Correct:D E

2.Which management suite delivers core management functionality for the HP BladeSystem solution, including server deployment, health monitoring, performance monitoring, vulnerability scanning and patch management?

- A.HP Storage Essentials
- B.HP Operations Software
- C.Insight Control Environment
- D.HP Systems Insight Manager

Correct:C

3.Which ProLiant Essentials Value Pack is an integrated power monitoring and management application that provides centralized monitoring and control of datacenter power consumption and thermal output?

- A.Insight Power Manager
- B.HP Rack and Power Manager
- C.Performance Management Pack
- D.Vulnerability and Patch Management Pack

Correct:A

4.Your customer wants to replace an existing c3000 Enclosure with a c7000 Enclosure. Which components from the c3000 Enclosure can be reused in the c7000 Enclosure? (Select three.)

- A.fans
- B.power supplies
- C.interconnect modules
- D.server and storage blades
- E.Onboard Administrator module

Correct:A C D

5.Which additional features are enabled when an iLO 2 Select Pack license is applied to an iLO 2 card on a server blade? (Select three.)

- A.virtual power
- B.scripted Virtual Media
- C.shared remote console
- D.integrated remote console
- E.Power Regulator for ProLiant
- F.high-performance, virtual KVM console

Correct: B C E

6. For enterprise deployment and management, customers can configure the HP Onboard Administrator to accept secured, single sign-on (SSO) from HP Systems Insight Manager. What is used for this process?

- A. SSL 128-bit key
- B. WBEM providers
- C. trusted certificate
- D. SNMP community strings

Correct: C

7. Which command lists, creates, removes and executes HP SIM tasks from the command line interface?

- A. mxtask
- B. simtask
- C. simmgnt
- D. axsched

Correct: A

8. You want to discover and visualize the SAN topology and gather information about the connected hosts. Which application is appropriate?

- A. SAN Loader tool
- B. HP Command View
- C. HP Storage Essentials
- D. HP Data Protector Express

Correct: C

9. Which Rapid Deployment Pack component consists of software optimizations for HP servers, including the HP scripting toolkits and support packs?

- A. PXE Server
- B. Integrity Integration Module
- C. Altiris Deployment Solution
- D. Microsoft Windows Automation Toolkit

Correct: B

10. An administrator is configuring a new task for automatic event handling. Which actions can be taken when events are received? (Select two.)

- A. forward the event
- B. change the event format
- C. run a custom command
- D. launch an external event handler
- E. map the appropriate logs to events

Correct: A C
